

Experiment – 19
CSA1717 - Artificial Intelligence

Name: Hemalakshmi H

Reg. No.: 192571049

Aim:

To write a Python program to remove punctuations from a given string.

Algorithm:

1. Start the program.
2. Define a string containing punctuations.
3. Read a string from the user.
4. Traverse each character in the string.
5. If the character is not a punctuation, add it to a new string.
6. Display the string without punctuations.
7. Stop the program.

Source code:

```
# Program to remove punctuations from a given string
```

```
punctuations = ""!()-[]{};:'"\<>./?@#$$%^&*~"
```

```
s = input("Enter a string: ")
```

```
result = ""
```

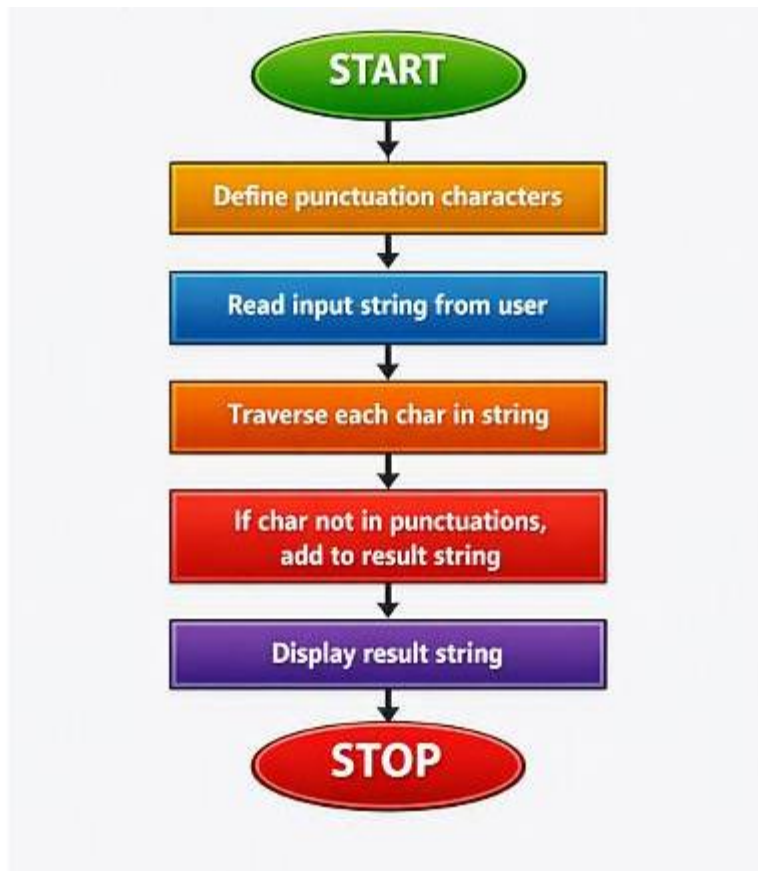

```
for ch in s:
```

```
    if ch not in punctuations:
```

```
        result += ch
```

```
print("String without punctuations:", result)
```

Flowchart:

Output:

```
Python 3.14.0 (tags/v3.14.0:ebf955d, Oct 7 2025, 10:15:03) [MSC v.194

= RESTART: C:/Users/hemal/OneDrive/Documents/SIMATS/AI/AI_PY/EXP 19_cc
Enter a string: hello!!!! how are you?
String without punctuations: hello how are you
```

Result:

The program successfully removes all punctuation marks from the given string and displays the cleaned text.
